Mathematics Course
Partials - How to register the exam

Luciano Battaia

Department of Management
Curriculum Business Administration and Management

December 21, 2017
The grade of the second partial

- The grade that will be published on the Unive platform is the **final grade** of the two partials.
- In order to obtain the grade of the second partial only, just double the published grade and subtract the one of the first partial.
Conditions to pass the exam

- You need to score at least 18/30 to pass the exam.
- If you score 16/30 or more after the two partials, you can ask for a supplementary oral examination. The final grade after the oral exam may be at maximum two points lower or higher than the grade achieved in the written exam.
- Students with a grade of 30 after the two partials can take the oral exam in order to obtain “30 e lode”, but remember that after the oral exam the final grade can also be lower, as previously mentioned.
Asking for the oral and registering the exam

- If you want to take an oral examination you must send a mail to the teacher, exclusively from your Unive mail address, before December 31st. No mail sent from private mail addresses will be considered. If you don’t pass the exam or if you don’t accept the proposed final grade after the oral examination you will be enrolled ex officio to the full exam of January 8, 2018, at 2 o’clock pm. The oral will be on January 8, 2018, at 10.30 o’clock am, room 8A.

- If you have passed the exam and you accept the grade of the two partials, without asking for an oral exam, you must enroll for the first call before January 4, 2018, as usual using Unive platform.

- If you don’t ask for an oral exam or you don’t enroll for the first call of the full exam, it is intended that you refuse the final grade of the partials.

- If you need some more info, please write a mail, exclusively from your Unive mail address.
